KINO FLO FLATHEAD 80 SYSTEM

Although relatively new, the **FLATHEAD 80** System has quickly become one of the most popular Kino Flos for gaffers and best boy/electrics. The Flathead 80 works pretty much like the vaunted Kino Flo 4Bank System, but it delivers twice as much light. Lamps are operated in half f-stop increments by a pair of high output, flicker free Select 4Bank ballasts. A removable center mount allows the lightweight fixture to be mounted directly to set walls or ceilings. The Flathead 80 comes with a new parabolic silver louver that controls the spread and direction of the light with minimal loss of output. Cardholders have also been added for attaching foam-core or other material to cut the light spill.
